Alex Kiersnowski

Senior Product Designer & Design Engineer · Warsaw, Poland (CET) · Available UK, EU & US Eastern hours

alex.kiersnowski@gmail.com · linkedin.com/in/alexkiersnowski · kiersnowski.com

Skills & Tools

Design & AI: Figma · Design systems · Claude Code · Cursor · Anthropic API · OpenAI API
Frontend: React · Next.js · TypeScript · Tailwind CSS · shadcn/ui · Radix
Mobile: React Native · Expo
Backend: Supabase (Postgres, RLS) · Auth · Stripe · Vercel

Summary

Senior Product Designer & Design Engineer with 10+ years bridging product design and production code, from managing a global design system at eBay to building full-stack products from scratch. I work with teams to ship web and mobile products end to end, using AI-native workflows and LLM integrations to move from idea to production in days, not weeks. My focus is turning product problems into something real users adopt and pay for, working closely with product and engineering on what's worth building. I do my best work in early-stage startups and fast-moving, high-autonomy teams.

Experience

Senior Product Designer / Design Engineer — Nord Security
Jul 2026 – Oct 2026 · Contract · Warsaw, Poland · Hybrid

Worked within the NordVPN apps team alongside the design engineering team, building AI-assisted prototyping infrastructure for a 60+ person design team and its product owners.

- Coded production-accurate front-end baselines of the NordVPN iOS and macOS apps (Connect, Real-Time Protection, Dark Web Monitor, Settings), handling complex interaction states and feature-dependent logic
- Cut AI token consumption and saved hundreds of hours of prototyping time by providing designers a pre-built code baseline instead of generating repetitive UI from scratch
- Shipped production code via GitLab merge requests to two core repositories: the internal AI prototyping platform and the Aurora AppKit design system

Venture & Product Builds

> **Design Engineer — Braza**
> Mar 2026 – May 2026 · Warsaw, Poland · Independent project
>
> Full-stack bilingual operations platform designed and built solo for a planned performance nutrition startup. Paused before launch given the scale of the physical operations.
>
> - Engineered a macro engine (Mifflin-St Jeor BMR, PAL multipliers, protein yield) across 8 biometric inputs, producing personalised meal plans and weekly pricing per client, impossible to deliver manually
> - Built a production sheet system that generates per-meal kitchen briefs with yield-adjusted shopping lists, removing manual calculation from the weekly order cycle
> - Integrated the Anthropic Claude API as a bilingual (EN/PL) natural language command bar, designed to cut order entry to under a minute per customer and handle 100+ weekly orders in under an hour
>
> Stack: Next.js · TypeScript · Supabase · Tailwind · shadcn/ui · Anthropic Claude API · next-intl · Vercel

Founder & Design Engineer — Fiive
Mar 2024 – Feb 2026 · Remote

B2B SaaS agency-client operations platform centralising requests, tasks, projects, and collaboration in a shared workspace.

- Led end-to-end product research under JTBD framework, conducting 19 interviews with senior agency and client stakeholders and synthesising findings into feature prioritisation
- Architected a secure multi-tenant backend with RLS policies and a broad relational domain model ensuring zero data leakage across organisation boundaries
- Integrated production billing via Stripe with webhook processing, signature verification, and full payment lifecycle management
- Designed for scale from MVP with virtualised rendering and query performance optimisation verified to 10,000+ tasks per organisation
- Compressed an estimated 12 months of development into 12 weeks using AI-assisted workflows, eliminating an estimated €250-500K in initial funding requirement
- Launched to 20+ organisations across the UK and EU, with active users in both agency and client roles

Stack: Next.js · React · TypeScript · Supabase · Tailwind · shadcn/ui · TanStack · Stripe · Resend · Vercel

Lead Product Designer — BPP
Jul 2023 – Mar 2024 · Contract · London, UK · Hybrid

One of the UK's largest professional education providers, undergoing a large-scale digital transformation.

- Led an organisation-wide design system build from scratch, establishing Figma variables, token structures, WCAG AA specs (incl. ARIA) and component props
- Embedded with engineering teams to publish Zeroheight documentation, contribute to Storybook and ensure UI parity across Product and Tech

Senior Product Designer — eBay / Adevinta
Sep 2021 – Sep 2022 · Contract · Berlin, Germany · Hybrid

MOVE, eBay's automotive classifieds unit (mobile.de, Kijiji Autos), later acquired by Adevinta.

- Built one design system shared across B2C, C2C and C2B marketplaces, integrated into the development pipeline via Storybook and Jenkins
- Led UX for trade-in functionality on mobile.de and localised the system post-acquisition for Canadian and Australian markets

Senior Experience Designer — Konrad Group
Mar 2020 – Sep 2021 · Full-time · Toronto, Canada · Hybrid

Full-service digital consultancy delivering strategy and design for global brands.

- Led UX for WestJet's in-flight entertainment system across 150+ aircraft, serving 22M guests a year
- Redesigned Deloitte KX and restructured the information architecture for Marks & Spencer's mobile app

Further 5+ years prior experience in junior and mid-level roles across London agencies.
